February Is Pet Dental Health Month Teeth Cleaning Special \$199

We are celebrating by offering teeth cleanings for your pet for only **\$199** during February and March. This event was launched by the Veterinary profession to bring awareness to the importance of dental health for our pets. We educate our clients every day about these issues. Dental health is just that important and we want every pet to have a chance to have a healthy mouth and a good life.

We did not cut out any services in this special. It is exactly the same as our full price service which includes the anesthesia, blood work, physical exam, teeth cleaning, IV fluids, hospitalization and more.

Preventative dentistry has made a major impact on quality and quantity of life for our pets. Keeping pets' teeth clean and mouths healthy can add up to two years to their life span. Quality of life has improved immensely.

Dirty teeth cause gingivitis which leads to periodontal disease and tooth loss, which allows bacteria to enter the blood, which leads to heart, liver and kidney diseases and poor quality of life and shortened life span. Period!

Not all dogs and cats need their teeth cleaned but it is estimated that at least 60 percent of them over the age of four do. This correlates with what I see in daily practice.

So if you want your pet family member to live as long as possible and have the best quality of life you must take care of their teeth.

Call us to schedule your appointment they will fill up fast! 576-9440 Dr. Curie
